Lorenzo Ferri
Curriculum Vitae

Via delle Ale 4, Lugano, 6900 CH
076 5092342
lorenzo.ferri@exmachina.ch

SUMMARY

- Software engineer focused on mobile (SwiftUI, Jetpack Compose) and web (React) development
- Experience integrating LLMs and AI agents into production applications
- Master's background in Artificial Intelligence with knowledge of programming paradigms and design patterns

WORK EXPERIENCE

2021-Present: Software Engineer

Ex Machina, Lugano

- Integrated LLMs and AI agents into applications to enhance functionality and workflows
- Built native Android and iOS apps with SwiftUI and Jetpack Compose
- Developed React web applications for internal and customer-facing tools

2020-2021: Mobile Developer

Nassa Studio, Lugano

- Built a Jetpack Compose tablet application for collision avoidance around power lines in helicopter operations

2018-2021: Frontend Developer

Omnibus Engineering SA, Taverne

- Developed a React application for monitoring and interacting with smart home devices

2017: Fullstack Developer

Coopar, Lugano

- Completed a 4-month internship building an Electron desktop application for survey visualization

OPEN SOURCE CONTRIBUTIONS

SwiftCrossUI - Windows Platform

Contributed the initial Windows implementation for SwiftCrossUI

- Implemented Windows platform support for a cross-platform Swift UI toolkit

EDUCATION AND TRAINING

2018-2021: Master in Artificial Intelligence

Università della Svizzera italiana, Lugano 6900 CH

- Coursework in Machine Learning, Deep Learning, Computer Vision, and NLP
- Experience with Python, TensorFlow, and PyTorch
- Strong foundation in linear algebra and probability

2015-2018: Bachelor in Informatics

Università della Svizzera italiana, Lugano 6900 CH

- Programming across multiple languages and paradigms
- Software design and development fundamentals
- Networking, client-server models, and web stacks
- Collaboration in agile software teams

TECHNICAL SKILLS

Programming Languages

- Swift
- Kotlin
- TypeScript
- C
- C++
- C#
- Haskell
- Lua

AI Agents & Tools

- Large Language Models (LLMs) integration and prompt engineering
- AI-assisted code generation and debugging
- Machine Learning model development and optimization
- Generative AI applications and workflows
