WORK EXPERIENCE

2021-Present: Software Engineer

Ex Machina, Lugano | www.exmachina.ch

- Integration of LLMs and AI agents into various applications to enhance functionality and user experience
- Mobile developer of native Android/iOS application with SwiftUI and Jetpack Compose
- Web developer of React web applications

2020-2021: Mobile developer

Nassa Studio, Lugano

- Mobile developer of a Jetpack Compose tablet application for collision avoidance with power cables on helicopters

2018-2021: Frontend developer

Omnibus Engineering SA, Taverne | www.oeomnibus.ch/

- Web developer of a React application for interacting with smart home devices

2017: Fullstack developer

Coopar, Lugano

- 4 months internship developing an electron desktop application for surveys visualization

OPEN SOURCE CONTRIBUTIONS

SwiftCrossUI - Windows Implementation

Contributed the initial Windows implementation for SwiftCrossUI

- Implemented cross-platform UI support for Windows using Swift

EDUCATION AND TRAINING

2018-2021: Master in Artificial Intelligence

Università della Svizzera italiana, Lugano 6900 CH

- Machine Learning and Deep Learning
- Computer Vision and Natural Language Processing
- Proficiency in Python, TensorFlow, PyTorch, and other AI-related tools
- Strong mathematical foundation in linear algebra, probability

2015-2018: Bachelor in Informatics

Università della Svizzera italiana, Lugano 6900 CH

- Solid programming skills across multiple languages and paradigms
- Proficiency in designing and developing software systems
- Practical knowledge of networking, client-server models, and web stacks
- Ability to work collaboratively in software development teams using agile methodologies
- Analytical thinking and problem-solving applied to computational challenges

TECHNICAL SKILLS

Programming Languages

I have experience with a diverse range of programming languages across different domains and paradigms:

- Swift
- Kotlin
- Typescript
- C
- C++
- C#
- Haskell
- Lua

AI Agents & Tools

Proficient in utilizing modern AI agents and tools to enhance productivity and solve complex problems:

- Large Language Models (LLMs) integration and prompt engineering
- AI-assisted code generation and debugging
- Machine Learning model development and optimization
- Generative AI applications and workflows
